He would like a manager to call or email him.  
Thanks,

---

I bought a stand of yours 2 years ago from [sportsmansguide.com](http://sportsmansguide.com) I've used it maybe a dozen times probably less, I went to use it sat night I got 15 feet up in a tree went to sit down and climb up with my feet and the strap broke and the top part of the stand fell to the ground and my feet got stuck in the foot straps while I was hanging upside down and backwards hugging the tree, i was able to lift myself up to the platform get pressure off my feet enough to free them and flip right side up and fall to the ground, my tendons and ligaments are stretched throughout my ankles calves muscles and knees are in so much pain I cant even walk. Most hunters I know would be completely unable to do what I did to free myself. I expect it to be made right one way or another I'm attaching my pics from my view from the ground when I got down
